The Journey...

Our journey didn't start from scratch with the registration of our company in the United Kingdom as a Limited Liability Company under registration number 15980448 in mid-2024. Instead, it extends over many years of experience dating back to 2009, when we took our first steps into the world of technology. Our team embarked on their journey as freelancers while also holding full-time positions in leading Arab companies, carrying with them ambition and challenges, and striving to develop innovative technology solutions that support business growth and development

For over 15 years, we have been dedicated to seeking the best solutions and strategies that empower businesses to achieve their technological goals with efficiency and professionalism. Our expertise has been built through the establishment and management of web hosting and development companies, as well as fostering strong relationships with businesses, global data centers, and entrepreneurs. Today, at Extendy Ltd., we continue our journey with confidence and determination to be the trusted partner behind your business success.

Our story hasn't ended yet; in fact, it has just embarked on a new journey since the establishment of our company. We aspire to write its next chapters together with you, earning your trust to become your reliable technology consultant and provider of IT infrastructure services for your business.

We don't just provide technical services and solutions; we work silently to showcase your brand with the utmost professionalism and confidence. We operate behind the scenes as the driving force that fuels your business growth, without taking the spotlight – because your success is our goal, not visibility.

We are committed to delivering white-label services under your brand, with a strong focus on ensuring that our company name remains invisible. Our goal is to make these services and products appear as if they were provided or developed by your own team.

You won't find your name on our client list—because we simply don't have one. We work silently behind the scenes to give your brand the brilliance it deserves. We believe that maintaining our clients' privacy is at the core of our commitment. Even if it presents a challenge for us, earning and preserving your trust always comes first.

We understand that not having a client list may pose a challenge to our visibility, but we have chosen this approach with confidence. Our commitment to client privacy is the foundation of our success and the core of our service philosophy.

Our Services

At Extendy Ltd., we offer a comprehensive range of technology solutions that empower startups and small businesses to focus on their growth, while we expertly handle their technical support and IT infrastructure. Our services are designed to meet your needs with precision and flexibility, ensuring the highest levels of performance and reliability.

Cloud Computing Consulting

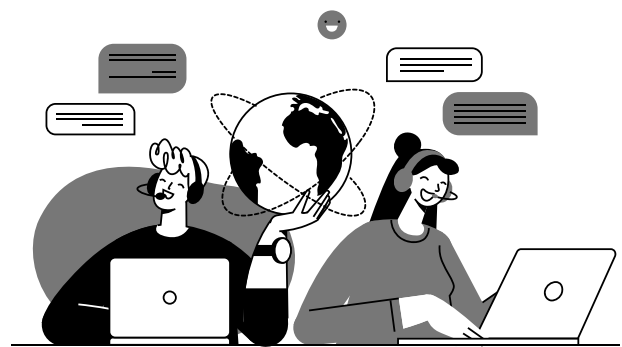

We help you make the right technology decisions by providing specialized cloud computing consulting services. Whether you are considering migrating to the cloud, optimizing your existing cloud environment, or selecting the best solutions for your business, our team will work closely with you to ensure the implementation of effective cloud strategies that guarantee high performance, security, and cost efficiency.

We offer comprehensive cloud consulting services covering **design, transformation, migration, and optimization**, addressing all aspects of your cloud infrastructure—from planning and deployment, including platforms, networks, and storage, to ongoing support during operation. Let us help you maximize the potential of your cloud environment. By optimizing resource utilization and reducing reliance on physical infrastructure, we enable you to achieve cost savings while making the most of cloud services.

Comprehensive Technical Support

At Extendy Ltd., we provide comprehensive solutions to ensure your systems run smoothly and efficiently. Our specialized technical consulting services are designed to continuously develop and enhance your IT infrastructure. Whether you're facing operational challenges or looking to optimize performance, our expert team is here to support you—allowing you to focus on growing your business while we handle all the technical aspects with precision and professionalism.

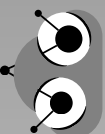

Disaster Recovery & Data Defense Management

At Extendy Ltd., we assist businesses in developing effective data protection strategies by designing robust backup plans, selecting the right environments, and ensuring seamless implementation. Our goal is to empower you to safeguard your critical data and maintain uninterrupted business continuity. Additionally, we offer support in selecting the most suitable backup service providers to meet your specific requirements, ensuring optimal solutions with the highest levels of security and reliability.

Your Data is Your Most Valuable Asset – Don't Wait for Disaster to Strike... Be Prepared and Protect It Now.

Our Services

Servers Administration and Management

At Extendy Ltd., we provide comprehensive server consulting services, including assessment, design, implementation, and ongoing management.

We help you choose the optimal technical solutions that ensure the highest levels of performance and security, offering server management and monitoring services to maintain the stability of your operational environment 24/7.

With our services, you don't need to be an expert in server management—our team takes care of all technical tasks, from routine maintenance to proactive monitoring and rapid issue resolution. All you need to do is focus on growing your business while we handle your IT infrastructure with precision and expertise.

Software Development

We provide white-label software development services that allow you to acquire customized solutions tailored to your unique business needs, all under your own brand.

Our dedicated team works closely with you to develop bespoke applications designed to enhance operational efficiency and achieve your business growth objectives.

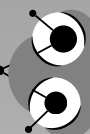

We are committed to delivering high-quality software that empowers you to stand out in a competitive market, ensuring flexible and scalable solutions that align with your future aspirations.

Digital Transformation

We help businesses achieve digital transformation through innovative solutions tailored to meet their unique needs and future aspirations.

We specialize in digitizing business operations and enhancing operational efficiency using the latest technologies, enabling you to stay ahead in a rapidly evolving market and gain a competitive edge. Our digital transformation solutions focus on reducing reliance on paper-based processes and traditional communications by providing advanced automation solutions, modern data management strategies, and fostering a fully digital work environment that helps cut costs and improve productivity.
